SY-X25 Series

NC400-A

5 port solenoid valve with detent SY-X25 Series

► We focus on machinery safety as a key part of our product development strategy. We have just developed a new version of our SY valve that will help you to satisfy your machine safety system requirements.

Main Features

► A valve with detent - The concept

The SY-X25 versions contain a detent that fulfils the well-tried safety principle "safe position", according to ISO 13849-2. This means that in case of pressure loss or in the case of shock or vibration within the given limits the spool stays in its last position.

► Validated according to ISO 13849-2

This product is capable of meeting the relevant basic and well-tried safety principles. Please request our validation document for the details.

► SISTEMA library is available

SY safety valves data are integrated into SISTEMA free software tool. Download it from our website and be ready to build your safety function.

► Still an option of our SY, the all-purpose valve

Benefit from the high versatility this series gives you and create your own configuration, tailored to your needs.
